

June 2008

A YOUNG HOMEOWNER WHO KNOWS HER WAY AROUND HARDWARE STORES CREATED THIS PROJECT WITH BERYN'S DESIGN GUIDANCE.

tahoe ski cabin remodel done on a shoestring

Beryn's client purchased a ski cabin in South Lake Tahoe that hadn't been touched in decades. Everything screamed 1970's, including the red carpets and iron light fixtures.

But this homeowner had a vision of its potential, and rather than venture forth on her own and possibly make some serious mistakes, she called on Beryn to develop her ideas and keep her on track.

The homeowner has plans to eventually sell the

property, but in the meantime, this well-designed remodel makes the house perfect as a rental for skiers.

With this objective in mind, and knowing that the owner would be making the improvements herself, Beryn reviewed all the materials that had been pre-selected, as well as the revised floor plans. She carefully guided the owner to make choices that would be both economical and desired by the future owners.

The remodel budget was practically non-existent, but with family and friends to lend a hand, the results are self-evident. Everyone is thrilled with how it turned out, as well they should be.
